Nano|Net Activities

Coordination-Collaborations-Networking

- Coordination of Innovation actions in the frame of N&I
- Collaboration with industrial Partners & Companies
- Participation in International Networks & R&I Projects
- Coordination & Interaction among Nano|Net clusters
- Promotion of Nano|Net and its members

Organization

- Organization of Visits, Meetings, Conferences and Summer Schools
- Educational and Training activities in N&I

Information

- Inform the R&I Society regarding Conferences, Industrial Forums, etc.
- Sensitize society for novel Technologies in N&I
- Funding & cooperation opportunities in R&I Projects

Expansion

- Growth of Nano|Net society with new members
- Promotion of new collaborations with other R&I Organizations

Affiliations Addressed

- Industrial Enterprises
- Research Centers & Institutions
- Universities Laboratories
- SME Companies
- Hospitals
- Policy makers

Nano|Net at a glance

Nano|Net started in 2003 from the Nanotechnology Lab LTFN, and today counts more than 670 individual members worldwide. Nano|Net is an International Network aiming to merge the existing expertise and knowledge between the emerging fields of Nanotechnologies and Nanobiotechnologies.

Nano|Net has a polythematic and multidisciplinary role since it joins the force of Industrial Enterprises, Research Centers, University Labs, SME Companies, Hospitals and Policy makers with the knowledge coming from Physics, Chemistry, Pharma, Computing, Biology, Medicine, Engineering, Materials Science, Nanobiotechnology and Nanosystems.

Nano|Net has also an educational and training role in close collaboration with the Interscientific Postgraduate Programs in "Nanosciences & Nanotechnologies" worldwide. Nano|Net also supports the "NANOTECHNOLOGY" annual multi-events and many other related Conferences, Clusters and Networks.

Nano|Net Clusters

Nano|Net Clusters

Vertical Clusters

- Nano(Bio)Medicine
- Thin Films & Organic Electronics
- Nanomaterials & Nanoengineering
- Nano in Energy & Environment

Horizontal Clusters

- Nanometrology & Tools
- Modeling at the Nanoscale
- Legal, Ethics & Health Safety Issues

Nano(Bio)Medicine

Thin Films & Organic Electronics

Nanomaterials & Nanoengineering

Nano in Energy & Environment

Nanometrology & Tools

Modeling at the Nanoscale

Legal, Ethics & Health Safety Issues

Nano|Net members worldwide

Objectives

- Coordinate the Activities of Nano|Net members, active in N&N
- Inform Network members about Research & Funding Opportunities
- Promote Partnerships, Mobility & Communication among members
- Identify the challenges and solutions in N&N
- Identify future Applications to focus the Research efforts
- Promote Technology Transfer from Lab to Industry
- Enhance the bonds and relations with the Industry
- Promotion and Lobbying activities

GR-Nanomed

GR-Nanomed is the Greek Nanomedicine Platform, promoting Nanomedicine Research and its Translation into Clinical Practice.

Main activity (choose one of the following)

Nano(Bio)Medicine

Thin Films & Organic Electronics

Nanomaterials & Nanoengineering

Nano in Energy & Environment

Nanometrology & Tools

Modeling at the Nanoscale

Legal, Ethics and Health Safety Issues

More activities (multi-selection)

Nano(Bio)Medicine

Thin Films & Organic Electronics

Nanomaterials & Nanoengineering

Nano in Energy & Environment

Nanometrology & Tools

Modeling at the Nanoscale

Legal, Ethics and Health Safety Issues
